Una **Storia** che profuma d'Oriente.

Un viaggio iniziato nel lontano **1910**, che ci accompagna fino ad oggi, con grande passione e determinazione.

L'avventura commerciale della **famiglia Giacomini** inizia con la costituzione di una società a carattere artigianale dedicata all'import di spezie dall'India, a cui ben presto, nel 1912, si affianca il commercio dei **filati in cocco**. L'impulso imprenditoriale e la propensione all'innovazione fanno sì che venga avviata l'azienda di tessitura con sede a Tezze di Vazzola, dove in pochi anni, a cavallo tra due guerre mondiali, vengono impiegati 120 operai nella produzione di zerbini in cocco. I costanti investimenti tecnologici, l'impegno nella ricerca, così come l'accuratezza nella scelta delle materie prime e del design, permettono una crescita continua, portando l'azienda alla fusione con la ditta Gambarova e all'apertura verso nuovi mercati internazionali, con una gamma di prodotti ampliata e rinnovata.

*The commercial adventure of the **Giacomini family** begins with the establishment of an artisan company dedicated to the import of spices from India, which soon, in 1912, was joined by the trade of **coconut yarns**. The entrepreneurial drive and the propensity to innovate led to the start of the weaving company based in Tezze di Vazzola, where in a few years, between two world wars, 120 workers were employed in the production of doormats in coconut. The constant technological investments, commitment to research, as well as careful selection of raw materials and design, allow a continuous growth, leading the company to the merger with the Gambarova company and opening up to new international markets, with an expanded and renewed product range.*

*L'aventure commerciale de la **famille Giacomini** commence par la constitution d'une société artisanale dédiée à l'importation d'épices en provenance de l'Inde, à laquelle s'ajoute bientôt, en 1912, le commerce des **filés de noix de coco**. L'impulsion entrepreneuriale et la propension à l'innovation font que soit lancée l'entreprise de tissage avec siège à Tezze di Vazzola, où en quelques années, entre deux guerres mondiales, 120 ouvriers sont employés dans la production de paillasons en noix de coco. Les investissements technologiques constants, l'engagement dans la recherche, ainsi que le soin dans le choix des matières premières et du design, permettent une croissance continue, conduisant l'entreprise à la fusion avec la société Gambarova et à l'ouverture vers de nouveaux marchés internationaux, avec une gamme de produits élargie et renouvelée.*

A **Story** that smells of the East.

A journey started in 1910, which accompanies us until today, with great passion and determination.

Une **Histoire** qui sent l'Orient.

Un voyage commencé en 1910, qui nous accompagne jusqu'à aujourd'hui, avec beaucoup de passion et de détermination.

Nel 1974 nasce il brand **Velcoc**, sinonimo di zerbini in cocco, attraverso il quale l'azienda si posiziona come leader mondiale nella produzione e commercializzazione di questo prodotto in cocco. Nel 2000, nello stato del Kerala, nell'India sud-occidentale, un altro progetto, sociale ed imprenditoriale, trova compimento: nasce **Kerafibertex**, frutto della fusione di due diverse culture per realizzare un prodotto ancora più innovativo ed ecocompatibile. Un traguardo raggiunto in termini di sostenibilità, intesa sia come rispetto della natura sia del benessere dell'uomo: un prodotto migliore, realizzato in un ambiente migliore.

*In 1974 the brand **Velcoc** was born, synonymous with doormats in coconut, through which the company positioned itself as a world leader in the production and marketing of this product in coconut. In 2000, in the state of Kerala, in south-western India, another social and entrepreneurial project is completed: **Kerafibertex** is born, the result of the fusion of two different cultures to create an even more innovative and environmentally friendly product. A goal achieved in terms of sustainability, understood both as respect for nature and human well-being: a better product, made in a better environment.*

En 2000, dans l'état du Kerala, au sud-ouest de l'Inde, un autre projet social et entrepreneurial trouve son accomplissement : **Kerafibertex** naît, fruit de la fusion de deux cultures différentes pour réaliser un produit encore plus innovant et écologique. Un objectif atteint en termes de durabilité, entendue à la fois comme respect de la nature et du bien-être de l'homme : un produit meilleur, réalisé dans un environnement meilleur.*
